EDUCATION

University of Belgrade, Faculty of Organizational Sciences **Oct 2020 – Oct 2024**
B.Sc in Informational Sciences and Technologies

Relevant Coursework: Data Structures and Algorithms, Databases, Information Systems Design, Internet Technologies, Statistics, Advanced Java, Advanced Programming, Intelligent Systems

TECHNICAL SKILLS

Programming Languages: C#, Typescript, SQL, Java
Frameworks & Libraries: ASP.NET Core, Entity Framework Core, Angular, SignalR, RxJS
Cloud & Infrastructure: Microsoft Azure, Docker, Kubernetes, CI/CD, Git
Architecture & Design: CQRS, REST, Microservices, Local-First, Distributed Systems
Data: SQL Server, PostgreSQL, Redis

WORK EXPERIENCE

Software Engineer · QCerris **Aug 2025 – Present**
Full-time · Hybrid · Belgrade, Serbia

- Contracted to an enterprise client, working on a large-scale .NET platform under NDA.
- Developing and maintaining backend services using ASP.NET Core and Microsoft Azure.
- Contributing to system design decisions, API development, and cloud infrastructure.

Software Engineer · TubeIQ **Nov 2024 – Aug 2025**
Full-time · On-site · Belgrade, Serbia

- Contributed to the migration of a large enterprise application from legacy .NET and jQuery to .NET Core and Angular, working alongside a senior core team.
- Rewrote and updated backend logic and UI components to align with modern architectural standards and frontend frameworks.
- Took part in designing and implementing RESTful APIs and database models to support new business features.
- Helped build and style an internal component library used across all enterprise solutions and worked with its integration in legacy software.
- Fixed critical bugs and handled UI issues in high-traffic modules, helping ensure stability across the platform.

Junior Software Engineer · TubeIQ **May 2024 – Nov 2024**
Full-time · On-site · Belgrade, Serbia

- Participated in the maintenance and development of an internal Angular form-rendering library used to display dynamic, schema-driven forms.
- Gained experience working in a BPM-driven system based on Camunda, learning how process automation integrates with dynamic UIs.
- Contributed to frontend and backend tasks across smaller features using .NET and Angular.

PERSONAL PROJECTS

B1ngo | C# (.NET) · Typescript (Angular) · PostgreSQL

- Real-time multiplayer bingo web application with SignalR for live game state synchronization.
- Built with a ports and adapters architecture, CQRS pattern, and PostgreSQL persistence.
- Deployed with Docker, CI/CD via GitHub Actions.

Job Experience Web Crawler | Python

- Python web scraper using requests and beautifulsoup4 to extract interview data from helloworld.rs.
- Gathered data from nearly 10,000 pages collecting interview questions, company names, positions and user feedback.

Check Mate | Java

- Java library for validating standardized numbers (ISBNs, IBANs, credit card numbers) using ISO-7064 and Luhn algorithms.
- Deployed as a Maven package with versioned releases

vstudio | C# (.NET)

- A .NET global CLI tool that opens Visual Studio solution files from the command line.
- Published as a NuGet package for streamlined developer workflow.

COURSES

IT: Foundational C# with Microsoft (Microsoft), Design Patterns in .NET (Udemy), Reactive Angular (Udemy), Spring Framework 6 (Udemy), Hibernate and Spring Data JPA (Udemy), Angular – The Complete Guide (Udemy)
Other: Project Management Training Program (Endava Adriatic)

LANGUAGES

- English (C2)
- Japanese (A1, currently preparing for JLPT N4)
- French (A1)

HOBBIES

- Lifeguarding
- Sports (F1, MotoGP, Football)
- Gaming
- Coding
- DJing
